

The background is a deep blue gradient with a subtle pattern of white dots. Overlaid on this are several faint, white geometric elements: concentric circles, arcs, and a large circular scale with numerical markings from 140 to 260. Some of these elements have small arrows indicating a clockwise direction.

Specification	Description
<b>ASUS ROG Strix NVIDIA GeForce RTX 3090 OC Edition 24GB Gaming Graphics Card</b>	
<p>ASUS ROG Strix NVIDIA GeForce RTX 3090 OC Edition 24GB Gaming Graphics Card is buffed-up design with chart-topping thermal performance. This Graphics card is featured with the building blocks whivh is the worldâ€™s fastest, most efficient GPU, the all-new Ampere SM brings 2X the FP32 throughput and improved power efficiency. It Experience 2X the throughput of 1st gen RT Cores, plus concurrent RT and shading for a whole new level of ray tracing performance. The Graphics card is also comes with 3rd Generation Tensor Cores, that get up to 2X the throughput with structural sparsity and advanced AI algorithms such as DLSS. Now with support for up to 8K resolution, these cores deliver a massive boost in game performance and all-new AI capabilities. In this Graphics card, Axial-tech fan design has been optimized for a new, larger heatsink that features more fins and surface area than last gen. Here, The blade count has been increased on all three fans, with 13 on the center fan and 11 on the auxiliary fans. The barrier ring on the side fans has been slimmed down to allow for more lateral intake and to provide better airflow through the cooling array. The center fan's extra blades and full-height ring that provide boosted static pressure to blast air directly onto the GPU heat spreader. In this latest GPU, the heat spreader draws heat up into heatpipes that carry it through a fin stack that fills a large 2.9-slot footprint. Increasing the heatsink size compared to the last generation provides more thermal headroom to account for the new high-performance chipset. In This Graphics card , the Axial-tech Fan Design has been tuned up with more fan blades and a reversed rotational direction for the center fan and also It's 2.9-slot design expands cooling surface area compared to last gen for more thermal headroom than ever before. The exclusive RTX 3090 Asus Graphics has Super Alloy Power II that includes premium alloy chokes, solid polymer capacitors, and an array of high-current power stages and also the GPU Tweak II provides intuitive performance tweaking, thermal controls, and system monitoring. n addition to under-the-hood design changes, the ROG Strix ASUS features a new face with metal accents that mirror the design aesthetic of ROG and ROG Strix motherboards and also mixing surface textures and materials make a statement when vertically mounted and lit by chassis LEDs. For those who prefer a sleeker, more subtle look, the greyscale colorway allows it to seamlessly blend into the build. The latest exclusive ASUS ROG Strix NVIDIA GeForce RTX 3090 OC Edition 24GB Gaming Graphics Card has 02 years of warranty.</p>

The background is a gradient of deep blue and purple, speckled with white dots resembling stars. On the right side, there are faint, light blue geometric patterns: a large circular scale with degree markings (90, 100, 110, 120, 130, 140, 150, 160, 170, 180, 190, 200, 210) and arrows, and a smaller circular diagram with concentric circles and arrows. In the bottom left corner, there is a partial view of a circular diagram with an arrow.

THANK YOU
